A few words from us

So here we are! *Cool School* is a magazine but it is not an ordinary one! We wrote some of these articles, but also cruised on the Internet to find funny and even interesting stories and reports on our favourite celebrities, sports stars and events that are happening around the world.

We are a group of students and we love English. Well, when we don't have to do it for the grades! Hope you will enjoy our edition of flash news!

On a lovely Friday afternoon, on September 30th 2022, two 5th grade classes visited the Explorers' Night. We went hunting for treasure, watched a few experiments, made slimes, learned about the 19th century fashion. We also had the opportunity to see graffiti and to make some too. One of the most interesting things was at the Faculty of Physical Chemistry where we were able to fly drones and control lego robots. We hope to go to this manifestation again as it was really fun!

World Food Day

Our 4th graders celebrated the World Food day by creating these amazing animals!

Amazing animals

The Fossa

The fossa lives in Madagascar. They look like cats with a monkey tail. They hunt day and night with more than half their food consisting of lemurs. Instead of jumping down from a tree like a cat, the fossa can climb down headfirst, which is unusual. They have scent glands that release a terrible smell when they are frightened.

Glasswinged butterflies have transparent wings. The reason behind this fantastic feature is the special tissues that form their wings. The tissues let the light to pass through. These amazing butterflies live in the forests and gardens of Central America. It's challenging to spot them.

MANTIS SHRIMP

FACTS

Mantis shrimps are **NOT TRUE SHRIMPS**

There are two distinct types of mantis shrimp.

Mating could be tricky for mantis shrimps.

Mantis shrimps pack the strongest punch in the animal kingdom.

Their unique vision has many advantages.

They rarely leave their burrows.

Mantis shrimps engage in ritualized fighting.

They have some of the most complex eyes in the animal kingdom.

THEIR CLAWS match their diets.

It is difficult to **KEEP THEM AS PETS**

Many countries consume mantis shrimps as food.

Some species of mantis shrimp are monogamous.

Their eyes can be useful for detecting cancer.

One species of mantis shrimp moves through somersaults.

A mantis shrimp punch can cause underwater shock waves.

They can identify and remember other mantis shrimps.

The clubs of smasher mantis shrimps are extremely durable.

Mantis shrimps are sometimes referred to as "thumb splitters".

In monogamous species, both parents take care of their eggs.

Griffon vultures are sociable birds. They were in a real danger 30 years ago. There were only 7 of them. Now there are around 450-500 griffon vultures around Zlatar mountain and in the canyon of the Trešnjica river.
